Customer: Geico spa Via Pelizza da Volpedo, 109/111 Cinisello B., Milano - Italy

Project: OTV4765 Ford Werke GmbH 50735 Köln ,

Implementation period: 02-06.2024

Scope of work:

1. Performing electrical, assembly works related to the installation:
 - 1.1. Production line
 - 1.2. Cable trays
 - 1.3. Electrical equipment: motors, sensors, production lights
2. Making electrical connections: motors, sensors, production lights
3. Performing electrical modifications in low-voltage switchboards
4. Electrical service
5. Grounding of electrical devices
6. Marking of electrical equipment

Project description:

These tasks were conducted as integral electrical support services, executed by Atempol and EDR System, with the primary objective of commissioning and streamlining production lines with Ford requirements. This encompassed the installation of production line systems, cable trays, and the integration of critical electrical components such as motors, sensors, and production lights. Furthermore, the project encompassed the precise establishment of electrical connections, modifications within low-voltage switchboards, comprehensive provision of electrical services, grounding of electrical devices, and systematic marking of all pertinent electrical equipment. The overarching aim of this initiative was to ensure the integration and sustained reliability of the electrical systems, emphasizing operational efficiency and stringent adherence to safety protocols and industry standards in Ford.

Customer's Opinion:

The Geico Management expresses its complete satisfaction with the professionalism and dedication demonstrated by the teams at Atempol and EDR System. Their extensive knowledge and experience were instrumental in resolving the technical challenges associated with our new production paint shop in Ford. These companies provided essential support during the final phase of our project, efficiently addressing and resolving technical issues that emerged during the commissioning process.

The expeditious execution of tasks, the outstanding quality of work performed, and the exceptional level of technical support provided warrant special recognition.
